

# EAGLE

## INTERIOR CONCRETE DYE

**INTERIOR CONCRETE DYE** is a penetrating dye that adds color to existing interior concrete. This coloring method provides an elegant decorative appearance without the harsh chemicals or tedious and expensive process of acid-based chemical staining. Beginning with a properly prepared surface, **INTERIOR CONCRETE DYE** can be applied and sealed in as little as one day, minimizing down-time. Nano-particles allow the color to penetrate the concrete, resulting in a durable treatment that will not wear away with traffic. Seal with Eagle **ARMOR SEAL**.
